Contents

Preface xiii

Part I INTRODUCTION 1

1 Statistical hypothesis testing 3
- 1.1 Theory of statistical hypothesis testing 3
- 1.2 Testing statistical hypothesis with SAS and R 4
  - 1.2.1 Programming philosophy of SAS and R 5
  - 1.2.2 Testing in SAS and R – An example 6
  - 1.2.3 Calculating p-values 11
- 1.3 Presentation of the statistical tests 13

References 15

Part II NORMAL DISTRIBUTION 17

2 Tests on the mean 19
- 2.1 One-sample tests 19
  - 2.1.1 z-test 19
  - 2.1.2 t-test 22
- 2.2 Two-sample tests 23
  - 2.2.1 Two-sample z-test 23
  - 2.2.2 Two-sample pooled t-test 26
  - 2.2.3 Welch test 28
  - 2.2.4 Paired z-test 31
  - 2.2.5 Paired t-test 33

References 35

3 Tests on the variance 36
- 3.1 One-sample tests 36
  - 3.1.1 χ^2-test on the variance (mean known) 36
  - 3.1.2 χ^2-test on the variance (mean unknown) 39

3.2 Two-sample tests 41
3.2.1 Two-sample F-test on variances of two populations 41
3.2.2 t-test on variances of two dependent populations 44
References 47

Part III BINOMIAL DISTRIBUTION 49

4 Tests on proportions 51
4.1 One-sample tests 51
4.1.1 Binomial test 51
4.2 Two-sample tests 55
4.2.1 z-test for the difference of two proportions (unpooled variances) 55
4.2.2 z-test for the equality between two proportions (pooled variances) 59
4.3 K-sample tests 62
4.3.1 K-sample binomial test 62
References 64

Part IV OTHER DISTRIBUTIONS 65

5 Poisson distribution 67
5.1 Tests on the Poisson parameter 67
5.1.1 z-test on the Poisson parameter 67
5.1.2 Exact test on the Poisson parameter 70
5.1.3 z-test on the difference between two Poisson parameters 72
References 75

6 Exponential distribution 76
6.1 Test on the parameter of an exponential distribution 76
6.1.1 z-test on the parameter of an exponential distribution 76
Reference 78

Part V CORRELATION 79

7 Tests on association 81
7.1 One-sample tests 81
7.1.1 Pearson's product moment correlation coefficient 81
7.1.2 Spearman's rank correlation coefficient 86
7.1.3 Partial correlation 91
7.2 Two-sample tests 94
7.2.1 z-test for two correlation coefficients (independent populations) 94
References 98

Part VI NONPARAMETRIC TESTS 99

8 Tests on location 101
8.1 One-sample tests 101
8.1.1 Sign test 101
8.1.2 Wilcoxon signed-rank test 105
8.2 Two-sample tests 110
8.2.1 Wilcoxon rank-sum test (Mann–Whitney U test) 110
8.2.2 Wilcoxon matched-pairs signed-rank test 114
8.3 *K*-sample tests 116
8.3.1 Kruskal–Wallis test 116
References 118

9 Tests on scale difference 120
9.1 Two-sample tests 120
9.1.1 Siegel–Tukey test 120
9.1.2 Ansari–Bradley test 125
9.1.3 Mood test 128
References 131

10 Other tests 132
10.1 Two-sample tests 132
10.1.1 Kolmogorov–Smirnov two-sample test (Smirnov test) 132
References 135

Part VII GOODNESS-OF-FIT TESTS 137

11 Tests on normality 139
11.1 Tests based on the EDF 139
11.1.1 Kolmogorov–Smirnov test (Lilliefors test for normality) 139
11.1.2 Anderson–Darling test 142
11.1.3 Cramér–von Mises test 145
11.2 Tests not based on the EDF 148
11.2.1 Shapiro–Wilk test 148
11.2.2 Jarque–Bera test 150
References 152

12 Tests on other distributions 154
12.1 Tests based on the EDF 154
12.1.1 Kolmogorov–Smirnov test 154
12.1.2 Anderson–Darling test 157
12.1.3 Cramér–von Mises test 160
12.2 Tests not based on the EDF 164
12.2.1 χ^2 Goodness-of-fit test 164
References 166

Part VIII TESTS ON RANDOMNESS 167

13 Tests on randomness 169
13.1 Run tests 169
13.1.1 Wald–Wolfowitz runs test 169
13.1.2 Runs up and down test 174
13.2 Successive difference tests 178
13.2.1 von Neumann test 178
13.2.2 von Neumann rank test (Bartels' test) 181
References 185

Part IX TESTS ON CONTINGENCY TABLES 187

14 Tests on contingency tables 189
14.1 Tests on independence and homogeneity 189
14.1.1 Fisher's exact test 189
14.1.2 Pearson's χ^2-test 192
14.1.3 Likelihood-ratio χ^2-test 195
14.2 Tests on agreement and symmetry 197
14.2.1 Test on Cohen's kappa 197
14.2.2 McNemar's test 200
14.2.3 Bowker's test for symmetry 203
14.3 Test on risk measures 205
14.3.1 Large sample test on the odds ratio 205
14.3.2 Large sample test on the relative risk 210
References 214

Part X TESTS ON OUTLIERS 217

15 Tests on outliers 219
15.1 Outliers tests for Gaussian null distribution 219
15.1.1 Grubbs' test 219
15.1.2 David–Hartley–Pearson test 223
15.1.3 Dixon's tests 225
15.2 Outlier tests for other null distributions 229
15.2.1 Test on outliers for exponential null distributions 229
15.2.2 Test on outliers for uniform null distributions 232
References 235

Part XI TESTS IN REGRESSION ANALYSIS 237

16 Tests in regression analysis 239
16.1 Simple linear regression 239
16.1.1 Test on the slope 239
16.1.2 Test on the intercept 243

16.2 Multiple linear regression 246
16.2.1 Test on an individual regression coefficient 247
16.2.2 Test for significance of regression 250
References 252

17 Tests in variance analysis 253
17.1 Analysis of variance 253
17.1.1 One-way ANOVA 253
17.1.2 Two-way ANOVA 255
17.2 Tests for homogeneity of variances 258
17.2.1 Bartlett test 258
17.2.2 Levene test 260
References 263
